

What is Claimed:

- 1 1. A device holder for an electronic toll pass device in a
2 vehicle comprising:
 - 3 a rear panel;
 - 4 a mounting apparatus affixed to the rear panel for attaching the
5 device holder to the vehicle;
 - 6 a front panel;
 - 7 a retaining device attached to the front panel;
 - 8 a base panel; and
 - 9 side plates connected to the front panel, base plate and rear
10 panel defining an opening adapted to removably receive and retain the
11 electronic toll pass device.
- 1 2. The device holder of claim 1, wherein the mounting
2 apparatus is at least one suction cup.
- 1 3. The device holder of claim 2, wherein the rear panel
2 further comprises at least one aperture for attaching the mounting apparatus
3 to the device holder.
- 1 4. The device holder of claim 1 , wherein the retaining device
2 is a business or credit card holder.
- 1 5. The device holder of claim 4, wherein the card holder
2 comprises at least two tabs for removably receiving and retaining business or
3 credit cards.

1 6. The device holder of claim 5, wherein the at least two tabs
2 are mounted to corners of the front panel.

1 7. The device holder of claim 1, wherein the retaining device
2 of the front panel is an eyeglass holder.

1 8. The device holder of claim 7, wherein the eyeglass holder
2 is a grasshopper clip attached to the front panel.

1 9. The device holder of claim 8, wherein the grasshopper clip
2 comprises a locking clasp to secure eyeglasses into place and a release
3 button to allow the release of the eyeglasses from the locking clasp.

1 10. The device holder of claim 1, wherein the retaining device
2 is a paper holder.

1 11. The device holder of claim 1, wherein the retaining device
2 is a picture holder.

1 12. The device holder of claim 11, wherein the picture holder
2 further comprises a picture frame window secured to the front panel with
3 sufficient space for a photograph to be inserted and stored between the
4 picture frame window and the front panel.

1 13. The device holder of claim 12, wherein the front panel
2 defines at least one groove adapted to removably receive and retain the
3 picture frame window.

1 14. The device holder of claim 12, wherein the picture frame
2 window is constructed of a plastic material.

1 15. The device holder of claim 1, wherein the retaining device
2 is a change holder adapted to removably receive and retain at least one coin.

1 16. The device holder of claim 1, wherein at least the front,
2 rear, side, and base panels are constructed of a material substantially
3 resistant to UV degradation.

1 17. The device holder of claim 16, wherein the material is
2 plastic.

1 18. The device holder of claim 1, wherein at least the front,
2 rear, side and base panels are of a unitary design, constructed by injection
3 molding, or are cast from a common mold.

1 19. The device holder of claim 1, wherein the opening is sized
2 to retain the electronic toll pass device by frictional fit.

1 20. The device holder of claim 19, further comprising a
2 protruding structure disposed on at least one of the front, side and rear
3 panels.

1 21. A device holder for an electronic toll pass device in a
2 vehicle comprising:

3 a rear panel;

4 a mounting apparatus comprising at least one suction cup
5 affixed to the rear panel for attaching the device holder to the vehicle;

6 a front panel;

7 a retaining device attached to the front panel, the retaining
8 device selected from the group consisting of a coin holder, picture holder,
9 grasshopper clip, and eyeglass holder;

10 a base panel; and

- 11 side plates connected to the front panel, base plate and rear
12 panel defining an opening adapted to removably receive and retain the
13 electronic toll pass device.
